Speech and Language Therapy Top Tip

Attention and Listening skills are the foundation of language. Without well-developed skills in this area, children will struggle to understand and respond appropriately.

In addition, children may have difficulties understanding language being spoken to them.

If you look carefully, you can often see these children struggling to listen and follow instructions. They often copy other children who have understood what to do.

Talk to Julian's SENCO Anna Smagala if you have any concerns.

We look forward to seeing you there. Further details to follow.
